Mardaani (2014) released in India on 2014-10-07,directed by Pradeep Sarkar.Mardaani is a Hindi movie. Priyanka Sharma is the lead.The Role of Electronic Health Records in Clinical Research. Clinical trials are the gold standard for evaluating medical interventions. Unlike drug trials, clinical trials often include well-defined, single-patient endpoints that do not depend on multiple patient measurements. However, even a clinical trial typically enrolls many patients and usually includes several measurements. That has led to a demand for the evaluation of entire data sets in clinical trials, both for the generation of hypotheses and for the determination of statistically significant results. Electronic health records are a rich source of data, and so are increasingly used to address these demands. This article reviews the general approaches that have been used to extract data from electronic health records, discusses their strengths and weaknesses, and discusses the challenges involved in data integration.Phonological processing in autism: revisited. The aim of this study is to evaluate the phonological processing skills in autistic children. The research design was a single-blind, randomized, cross-over, counterbalanced study. A group of 15 children with autism and 15 typically developing children, matched for age, sex, and verbal IQ were compared with a non-significant level of 0.05. The materials used were the standardized Italian and the Peabody Picture Vocabulary Test--Revised. Although the lack of significant differences was evident between the two groups, a deeper analysis of the results showed that the autistic children had a greater deficit in the use of phonology in reading than the TD children. The results also showed that the repetitive
